Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 6/15/07 (an election).
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Election/Restriction

1. Applicant's election with traverse of Group I, claims 1-6, in the reply filed on 6/15/07 is acknowledged. The traversal is on the ground(s) that "the Examiner has failed to show, other than allege, that the claims of Groups II and III have other uses besides that shown by the instant invention. There is a commonality that exists between Groups I, II, and III." This is not found persuasive because the search required for Group I is not required for Group II or Group III, if all Groups are searched an additional burden is imposed on the Office due to different search areas being required. The process of making claims 7-12 require specific process steps including specific raw materials and process conditions, such as temperatures and specific technique. Whereas, the product claims 1-6 do not require these process steps, but only the product properties and its structure. As for apparatus claims 13-15, it requires a catalyst, which is made of the product of claims 1-6, which is different from the Group I and Group II inventions. The inventions are not related to one another, thus the restriction is maintained.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 7-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention(s), there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 6/15/07.

Claim Rejections - 35 USC § 102(e)

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Suengaga et al., “hereinafter Suengaga”, (US Pat. 7,005,405 B2).

The applied reference has a common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C.

102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Suengaga discloses the claimed metal particle-dispersed composite oxide comprising the claimed matrix material, surface metal particles and inner metal particles precipitated on an inner surface of the matrix material as being claimed (see Suegaga at col. 19- col. 20, claims 1-11; see also col. 9, ln 50-53, and entire reference for more details).

There is no patentable distinction seen between the claimed material and that disclosed by Suengaga. Thus, the claims are anticipated by the reference.

Citations

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All references are cited for related art. See PTO-892 Form prepared.

Conclusion

6. Claims 1-15 are pending. Claims 1-6 are rejected. Claims 7-15 are withdrawn due to nonelected (distinct) invention(s). No claims are allowed.
